Cyclamatic pro foldaway manual

This is a Cyclamatic Pro CX4 folding electric bike that's super easy to fold and store. You can stash it in your home, garage, or car boot without any hassle. It comes with a strong 250w brushless motor that lets you zoom up to 15mph. The battery is fully sealed, making it safe for wet conditions. You can cover 18.5-25 miles on a full charge, but don't expect an auto electric mode - there's still some pedaling required! The bike gets you where you need to go faster and with less effort from you. The Cyclamatic CX4 Pro E-Bike is powered by a heavy-duty lithium-ion battery and comes with 5 levels of pedal assist. You can cruise at speeds up to 15.5mph and cover distances of 18.5-25 miles on a full charge, depending on your ride style and weight. The bike's lockable battery is fully sealed, making it perfect for all-weather adventures. There's even a battery indicator on the handlebars so you can keep an eye on your power levels. For comfort, the Cyclamatic CX4 Pro E-Bike features a padded saddle and dual suspension (front and rear) to smooth out those pesky bumps in the terrain. The Shimano 6-speed gears and disc brakes provide sure-stopping power. The bike's height-adjustable seat and handlebars cater to riders from 5ft 4″ to 6ft 2″, supporting a maximum weight of 220 lbs. The Cyclamatic CX4 Pro E-Bike folds up easily, making it perfect for small spaces or on-the-go adventures. Its quick lock release mechanisms let you fold the alloy frame at the crossbar and stem with ease. Additional features include 20″ wheels, Kenda tires, a spring-loaded kickstand, and fenders to keep you dry and rolling smoothly. The Cyclamatic CX4 Pro Electric Bicycle is available in sleek black or white colors, featuring a front suspension fork and Shimano 6-speed gears. This e-bike has various drive modes, speeds of up to 15.5 mph, and an average distance range per full charge of 18.5 – 25 miles. The battery life is also impressive, with a very low self-discharge rate when not in use. Key features of the Cyclamatic CX4 Pro include: * A powerful 250W brushless motor * A fully sealed 24V 10Ah Li-ion Battery that's lockable and quick-release enabled * Five levels of pedal assist modes controlled via handlebar controls * Dual suspension for a smooth ride * Front & rear disc brakes, along with front & rear fenders (mud guards) * Padded saddle and tilt-lock seat with a seat height range of 34.5″ – 37.5″ * Kenda tires on 20″ wheels that are quick-release enabled at the front wheel * A bell and rear electric light for added safety The Cyclamatic CX4 Pro is designed to fold compactly, making it easy to store or transport. It's suitable for riders from 5 ft 4″ – 6ft 2″ tall and supports a rider weight up to 220 lbs. I was thrilled to get this e-bike and take it out for a spin with my family. The Cyclamatic CX4 Pro is a real winner when it comes to comfort and power assist - I love the kick-in feature that gives me a great workout without putting too much strain on my knees. R.S. agrees, saying it's easy to ride and folds up nicely, but could be tricky to carry folded onto public transport. She also notes that the motor can be loud when coasting, but that might just be something to get used to over time. I.H. is another fan of this e-bike, praising its speed, battery life, and brakes - although he does mention it's not super lightweight and didn't come with a manual.
