|                           |                    |  |                           |

# **Additional Tips**

- Prefer frequent smaller meals instead of few large meals.<sup>1</sup>
- Prefer to use brown rice instead of white rice.<sup>4</sup>
- Use a variety of grains such as cracked wheat, oats, barley, ragi and other millets, instead of rice.<sup>4</sup>
- Avoid washing rice several times before cooking and also avoid the process of cooking rice in excess water and draining.<sup>4</sup>
- Avoid frying of foods in oil and try to use alternative methods such as dry roasting and baking.<sup>4</sup>
- Try to cook food using minimum amount of oil and prefer using olive, canola or peanut oils.<sup>4</sup>
- Include raw vegetables such as onions, tomatoes and capsicum with every meal.<sup>4</sup>
- Prefer to remove fat from milk.<sup>4</sup>
- Minimise salt consumption.<sup>1</sup>
- Avoid cigarette smoking and consume alcohol only in moderation.<sup>1</sup>

# Take-Home Messages

- Healthy diet is an important part in the treatment of diabetes.
- Eat frequent smaller meals instead of few large meals.
- Try to eat more fresh fruits and vegetables as snacks instead of fried or oily foods.
