INTRODUCTION

PURPOSE OF THE POLICE FIELD TRAINING MANUAL

Every new police officer eligible for certification is issued the Police Field Training Manual (FTM). The FTM is an essential element of the officer's training program upon completion of the Basic Police Course. Completion of the FTM reinforces and complements the basic course. With proper administration and supervision, the FTM provides the field training needed to supplement classroom training, allowing the officer to apply basic law enforcement principles. This is an important phase of basic police training.

HISTORY AND DESIGN

This manual has been updated through the efforts of representatives of law enforcement agencies and Department of Public Safety Standards and Training (DPSST) staff who have been active in field training programs. These representatives provided insight, experience, and their departments' field training manuals to be used as resources.

The Police Officer Field Training Manual has been restructured to better parallel the chronological development of a new officer. Through design and topic placement the manual will help the new officer to develop previously learned skills as new skills are introduced.

While Oregon public safety agencies may create their own policy to implement this program fully, the manual contains the fundamental requirements and guidelines for police officer certification.

OBJECTIVES

The purpose of the Police FTM is to:

- Produce a highly trained and positively motivated police officer capable of meeting or exceeding standards of performance required by the employing agency.
- Provide equal and standardized training to all newly hired police officers and to provide corrective training in those areas where deficiencies are identified.
- Build on the foundation of knowledge given in the Basic Police Course, thereby creating an environment in which the new officer may develop new skills, as well as increase proficiency in those skills acquired in the academic setting.
- Improve the agency screening process by providing on-the-job observation of each new officer's performance categories.
- Increase the overall efficiency and effectiveness of the agency by enhancing the climate of professionalism and competency demanded by the ethical standards of law enforcement.

INSTRUCTIONS

Completion of the FTM is a requirement for DPSST Basic Police Certification. Pursuant to ORS 181A.490 and OAR 259-008-0060, the FTM must be completed in its entirety within <u>eighteen months</u> from the date any individual is employed as a police officer.

The FTM is designed to be a continuation of the mandated basic training course. The manual provides topics to review during the new officer's trial service period, regardless of their previous training or experience. The FTM ensures that the officer knows how to apply basic law enforcement principles within the department and the community served. The FTM is designed to be flexible and equitable in order to facilitate the various learning rates and needs of new officers assigned to the field training program. Should the officer fail to grasp the information given, corrective training may be initiated in an attempt to help them meet the objectives outlined in the FTM.

The FTM is separated into Modules (1-6), Sections (1.1 - 6.3) and Topics (1.1.1 - 6.3.4). Each topic must be completed and signed/dated by both the officer and their Field Training Officer. There are two types of topics, **Understood** and **Demonstrated**.

- **Understood** topics can be completed through discussion between the officer and the FTO or completed to the satisfaction of the FTO. Understood topics generally start with *"The officer understands..."*
- **Demonstrated** topics are all other topics and must be observed and completed through field performance. If not physically performed on the job, demonstrated topics must be completed as a scenario to the extent that shows that the new officer has the knowledge to complete those tasks at such time the officer is faced with them in the course of their duties.
- **NOTE:** The FTO is responsible for coming up with a scenario, whether it is utilizing set-up locations or individuals. A discussion of the topic including a verbal scenario that shows the new officer's understanding and knowledge of the subject or task may also be applicable.

Upon completion of the FTM, the Completion Form (F33) found near the end of the manual must be completed and submitted to DPSST. The completed FTM must be retained by the agency and made available to DPSST upon request.

The Board on Public Safety Standards and Training (BPSST) may deny or revoke the certification of any police officer upon finding that any information submitted to the Department was falsified under ORS 181A.640 and OAR 259-008-0070.

FIELD TRAINING MANUAL FAQs

1. What if the officer does not have the ability or opportunity during the course of their duties as an officer to physically demonstrate a mandated demonstrated topic?

As stated in the administrative process; each mandatory item, if not physically performed onthe-job, must be completed as a scenario to the extent that shows that the officer has the knowledge to complete those tasks at such time the officer is faced with them in the course of their duties. The FTO is responsible for coming up with a scenario, whether it is utilizing setup locations and individuals or discussion of the topic; including a verbal scenario that shows the officer's understanding and complete knowledge of the topic or task.

2. Do we have to follow the manual in chronological order from start to finish?

No. The manual, while re-organized to better suit the chronological progression of the officer, is set up to be flexible. Opportunities that address modules at the end of the FTM may arise early in field training. Take advantage of those situations, the exposure is not something to overlook, but make sure to evaluate the officer only on things they have been trained to do.

3. What if the trainee has specialized duties that may not be applicable in the FTEP process? Can we alter the FTM?

It is important to understand that an individual agency's unique structure or responsibilities cannot be a factor for purposes of state certification. Specialized duties should be addressed within your own agency training or advanced training academy program, not by altering the FTM. Altering the FTM will invalidate it. Any officer can transfer employment to any other law enforcement agency in the state and every agency has the knowledge that the officer has successfully completed the required FTM. With that understanding, all officers must complete every required element of the FTM and demonstrate every portion that requires demonstration.

4. How do we rate consistently?

Use the guidelines established by your agency.

5. How do we ensure consistency between the FTOs if we do not have a training coordinator or someone to oversee the training process?

Your agency's management ultimately decides this. However, one suggestion is the temporary selection of an employee to oversee the administrative aspect to ensure consistency and accuracy and to reduce liability.

6. Is it necessary to keep the notes written throughout the day if the information is later transferred to the DOR?

Yes. This is important documentation that needs to be saved if action is taken.

7. Who can we share officer progress/DORs with?

Training files are subject to public record laws. However, depending on their contents they may be protected from disclosure under most circumstances and therefore should be treated as confidential. You should follow your agency procedures regarding reviewing this information with others within your agency who are involved in the officer's field training.

8. What is the correct way to document NRT (Not Responding to Training)?

First, you must have a sense of when the training process gets to the NRT level. Consider the following questions:

- What has been done to train the recruit on this issue?
- What have been the performances by the recruit?
- What has been done to re-educate the recruit?
- What has the recruit's performance been like after re-education?
- Has there been improvement?
- Is everything thoroughly documented, including re-educating and level of performance after the attempts to re-educate?
- **9.** What happens if I document behavior and actions that support termination and the agency retains this person?

Hiring and/or firing are not decisions for line staff. If the supporting facts, scoring, and failure to respond to re-education have been properly documented and submitted in a timely manner through the appropriate chain of command, you are not responsible for the retention decision.

OACP/OSSA MODEL POLICY: EYEWITNESS IDENTIFICATION

1. PURPOSE

The purpose of this policy is to provide procedures for obtaining objective results when preparing and conducting lineups and showups.

2. POLICY

It is the policy of this agency that eyewitness identifications be conducted in a manner most likely to assess witnesses' true and reliable recollections and in compliance with state and federal constitutional requirements.

3. DEFINITIONS

- **Blind Presentation** The presenter does not know who the suspect is. Also known as double-blind presentation.
- **Blinded Presentation** The equivalent of a blind presentation; conducted when the presenter knows who the suspect is. Also known as functionally equivalent presentation.
- **Confidence Statement** A witness's statement about his selection and of his confidence that his selection is the suspect; taken immediately after a pick has been made.
- **Photo Lineup** A presentation of photographs of persons.
- **Presenter** The officer presenting a lineup.
- **Showup** A presentation of a live person in the field that is close in time and proximity to the incident under investigation.
- **Sequential** A presentation of photographs one at a time, retrieving one photo before presenting another.
- **Simultaneous** A presentation at the same time of photographs arrayed together, either manually constructed or computer generated.

4. DOCUMENTATION

- A. Instructions to witnesses shall be read from the Eyewitness Identification form, which form shall also include the witnesses' affirmation of their confidence statements.
- B. In addition to documentation in the incident report(s) and on Eyewitness Identification forms, when it is reasonable and practical presenters should record the presentations.
- C. Lineups, forms, and recordings shall be treated as evidence, with copies of the lineups and forms included in the case file, whether or not the witnesses made identifications.

- D. If a photo lineup is developed electronically, the lineup shall be printed for documentation.
- E. See also Post-Presentation Interview and Documentation.

5. WITNESSES WITH LIMITED ENGLISH PROFICIENCY

If a witness to a criminal offense does not fluently speak the English language or otherwise has difficulty communicating (e.g. hearing impaired), officers should make reasonable efforts to arrange for an interpreter before proceeding with an eyewitness identification.

Before the interpreter is permitted to discuss any matter with the witness, the investigating officer should explain the process that will be utilized to the interpreter. Once it is determined that the interpreter comprehends the process and can explain it to the witness, the eyewitness identification may proceed as provided for within this policy.

6. PHOTO LINEUP

When a photo lineup is used for suspect identification, a blind or blinded sequential presentation should be made; consequently, the procedures that appear below are designed primarily for blind or blinded sequential presentations. If another photo lineup method is used-including a simultaneous presentation or a sequential presentation that is not blind or blinded-the reason(s) for using that method shall be documented.

7. DEVELOPMENT OF A PHOTO LINEUP

- A. Officers should obtain a thorough suspect description from each witness before developing a photo lineup. (Note that variant witness descriptions may require the presentation of different photo lineups to different witnesses.)
- B. A photo lineup shall consist of no fewer than six photographs, including one of the suspect.
- C. All photos should be similarly sized and none should be easily distinguished from the others.
 - 1. Filler photographs (not of a suspect) should generally fit the witness's(es's) description of the suspect. Because all photographs possess both common and variable features, the common features should be those that match the witness's(es's) description, whereas the remaining (i.e., nonrecalled or undescribed) features may vary.
 - 2. When there is limited or insufficient suspect description or when the suspect description differs significantly from the available photograph(s) of the suspect, the filler photographs should resemble the suspect photograph, not the description.
- D. The photos shall be numbered and shall be loose or in individual folders.

E. When conducting a single lineup for multiple witnesses, the photographs should be renumbered for each witness.

8. PRESENTATION OF PHOTO LINEUP

A. Instructions to Witnesses

Prior to a presentation, the presenter shall read the witness instructions from the Eyewitness Identification form, ensuring and documenting that the witness understands the instructions.

B. Blind Presentation

- 1. In a blind presentation, the presenter does not know the identity of the suspect.
- 2. The presenter shall present the photos to the witness sequentially, with one photo replacing another so that no two are presented at the same time.
- 3. The presenter shall present each photo to the witness, even if the witness identifies a previous photo as the suspect.
- 4. If, during the same presentation, the witness asks to see one or more photos again, the presenter may conduct the same presentation a second time but must present all of the photos, using the same method.

C. Blinded Presentation

If the presenter knows who the suspect is, an extra measure should be taken to prevent the presenter from knowing which photo is being shown to the witness.

- 1. The photos shall be placed in identical folders, with the folders shuffled and numbered, and each photo shall be presented such that only the witness can see the photo; the presenter is thus "blinded" to the process and cannot be suggestive.
- 2. The presentation shall continue as in 8.2 above.
- D. Post-Presentation Interview and Documentation
 - 1. Following the presentation of a photo lineup, the presenter should avoid any words or actions that might identify the suspect or hinder further investigation.
 - 2. If the witness picks a photo, the presenter shall ask the witness to describe why the photo was selected and to describe the confidence he or she has in the selection. The presenter should obtain a description of that confidence, not just a scaled assessment (e.g., not "90% sure" or "six out of ten"). The witness' responses to the questions-commonly referred to together as a "confidence statement"-shall be carefully documented on the Eyewitness Identification form and, later, more completely in the report.
 - 3. The presenter shall ask the witness to affirm the confidence statement on the Eyewitness Identification form.

9. DUPLICATION OF PRESENTATIONS

Presentations separated by time but involving the same suspect are discouraged. It is recommended that a suspect not be presented for identification more than once in any form. If this does occur, the reason(s) why a subsequent presentation was made shall be documented.

10. SHOWUPS

Photo lineups are preferable to showups; however, some circumstances require the prompt display of a suspect to a witness. Showups should be conducted as follows:

- A. Consider if a photo lineup can be conducted instead.
- B. Obtain a thorough description of the suspect from each witness prior to the showup.
- C. Ensure all officers avoid suggestive words or conduct while preparing for the presentation.
- D. If possible, avoid unnecessarily tarnishing the suspect by, for example, presenting a suspect in handcuffs or from the backseat of a patrol car.
- E. Transport the witness, not the suspect.
- F. Separate witnesses to avoid communication between them.
- G. Read the instructions from the Eyewitness Identification form, ensuring and documenting that the witness understands the instructions.
- H. Document the witness's statement on the Eyewitness Identification form.
- I. When possible, record the presentation.

11. TRAINING

All sworn personnel shall receive training on this policy and the presentation of lineups and showups.

INSTRUCTIONS (READ BY OFFICER TO WITNESS)

In a moment I'm going to show you some photographs. A photograph of the person who committed the crime may or may not be among them. You will be shown all of the photographs and you may take your time looking at them.

If you see the person who committed the crime, pick that photograph. If not, don't pick any photograph.

If you pick a photograph, I'm going to ask you to explain why you picked that photograph and to describe how confident you are.

Do you understand these instructions?

INSTRUCTIONS (READ BY OFFICER TO WITNESS)

In a moment a person is going to be shown to you. Just because the person is being shown to you or because police officers are standing nearby does not mean the person committed the crime or any other crime.

If you tell me you recognize the person as the person who committed the crime, I'm going to ask you to explain why you recognize him or her as the same person and to describe how confident you are.

Do you understand these instructions? _____
